

Meals & Bowls — Client Handover Document

Official Technical Handover, Database Info & Operations Guide | Date: August 2026

1. Project Access & Credentials

Item / Portal	URL / Details
Customer Portal Login	https://your-domain.vercel.app/login
Admin Panel Login	https://your-domain.vercel.app/admin/login
Admin Default Mobile	9999999999
Admin Default Password	utkarsh13

2. Key Features Delivered

A. Customer Web App Portal

- Phone Number Login & Signup with JWT Security.
- Active Subscription Dashboard, Remaining Meals Counter, Expiry Indicator.
- Daily Meal Consumption History & Profile Settings.

B. Admin Management System

- **Customer Management:** Create, View, Edit, Search, and Delete customer profiles.
- **Subscription Plan Assignment:** Activate 30-Meal (■2,700) or 56-Meal (■5,000) plans with automatic validity calculations.
- **Meal Management (Serving):** 1-Click Lunch & Dinner meal serving, meal correction audit logs.
- **Payment Tracking:** Record manual/online payments with full transaction logs.
- **Reports & Analytics:** Daily served meal totals and expiring plan alerts.
- **WhatsApp Automated Gateway:** Live WhatsApp QR Scanner (/admin/whatsapp) with automated meal serving notifications & session recovery.

3. Database Information (MongoDB Cloud Atlas)

Property / Collection	Details / Purpose
Database Engine	MongoDB Atlas (Cloud NoSQL Database)
Database Name	meals_bowls
Collection: customers	Customer accounts, mobile numbers, passwords, status
Collection: subscriptions	Active & expired subscriptions, start/end dates, total & remaining meals
Collection: meals	Daily meal serving logs (Lunch & Dinner status per customer)
Collection: payments	Payment transaction records, receipts, and payment statuses
Collection: plans	Thali subscription plans specs (Plan 1: 30 meals, Plan 2: 56 meals)

4. Daily Operations Guide for Client

Step 1: Connect WhatsApp (One-Time Setup)

- 1. Navigate to Admin Panel → **WhatsApp Status** (/admin/whatsapp).
- 2. Click **Generate New QR** (if disconnected).
- 3. Open **WhatsApp / WhatsApp Business App** on phone → **Settings** → **Linked Devices** → **Link a Device** → Scan QR Code.
- 4. Gateway status turns **Connected**. Automated notifications will now send directly to customers on WhatsApp!

Step 2: Serve Daily Meals

- 1. Open **Meal Management** (/admin/meal-management).
- 2. Select **Lunch** or **Dinner** tab.
- 3. Click **Serve** next to customer name. Meal count updates instantly and WhatsApp notification triggers.

5. Environment Variables & Hosting Architecture

Layer	Platform	Environment Variables
Frontend	Vercel	VITE_API_BASE_URL=https://your-backend-api.onrender.com
Backend API	Render / Railway	MONGODB_URI, JWT_SECRET, ADMIN_PASSWORD=utkarsh13, WA_GATEWAY_URL, FRONTEND_URL
WA Gateway	Render / Railway	PORT=3001, WA_GATEWAY_API_KEY=meals-bowls-secret

6. Maintenance & 24/7 Always-On Setup

- **Health Check Endpoint:** https://your-backend-api.onrender.com/api/public/health
- **24/7 Keep-Alive:** Configured via UptimeRobot / Cron-Job.org (pinging every 5 minutes so Render backend never sleeps).
